CITY LIGHT COLUMNS

City Light columns are backlit poster columns that reach high customer contact numbers, regardless of whether during the day or at night. City Light columns can also be ideally combined with City Light posters because the backlit columns can accommodate six 4/1 or three 8/1 City Light posters.

The 8/1 portrait format is particularly popular in the fashion industry and is always fully booked during Fashion Week. City Light columns are usually booked in networks. Alternatively, you can put together your own individual network or book just a single column.
